BRISTAN

New Designs. New Finishes.

Bristan has expanded its Kitchen portfolio with a host of new tap offerings.

Upgrading the established and loved Easyfit Kitchen Taps range with six new finishes in our most popular lines.

Along with a brand-new range of pull-out kitchen taps, as well as an additional 5 new design taps.

New Finishes

Easyfit Kitchen Tap collection now features 20 product styles in a range of trend-led finishes including Britan's signature Chrome, Stainless Steel, Black, Brushed Brass, Gun Metal and Brushed Nickel.

Unlike other brands, our Kitchen Taps combine effortless style with solid engineering and the reassurance of Britain's number one brand in taps & showers.

New Pull Outs

Expanding our Pull-Out Kitchen Tap range, new for 2024 we have the addition of five new designs - Axia, Jule, Sabre, Silhouette and Profile, taking the range line up to nine distinctive product options.

Pull-Out Kitchen Taps offer a practical, perfect solution for the consumer whether rinsing fruit and veg or removing stubborn food from pans, becoming a statement tap within the home.

New Designs

Adding to the existing Kitchen Tap product line up for 2024 will be five new contemporary single lever kitchen tap designs, all featuring the Top Fix Easyfit technology - Acorn, Fern, Maple, Spruce and Pine.

Available in the trend-led finishes, Chrome, Stainless Steel, Black, Brushed Brass, Gun Metal and Brushed Nickel.

Range In Detail

As with all our products, the new designs have been rigorously tested to comply to quality standards and are supported by our exceptional guarantees, award-winning customer service, and with a full suite of spares. They are also available with our industry-leading next day delivery service promise.

Easyfit Top Fix Kitchen Taps

EASY TO FIT. HARD TO BEAT.

- Easyfit top fix for quick installation
- All parts and tools included in the box including an Allen key, isolation valves, Easyfit base, Easyfit tool and flexi tails
- Long-lasting ceramic cartridges, valves and metal fixings
- Choice of trend-led finishes including scratch-resistant, hard-wearing chrome
- Swivel spout
- 10 year parts guarantee, plus 1 year labour
- From a brand rated Excellent on Trustpilot and recommended by installers
- Spares available for several years after discontinuation
- Quality tested and assured
- Developed for UK water systems, to meet UK standards
- Supported by Bristan's award-winning UK customer service team and a team of mobile service engineers offering on-site labour support for products within warranty.

Eco Start & Thermaclick

Eco Start

Eco Starts lets you choose when hot water is required, saving money on your energy bill, and reducing your carbon footprint.

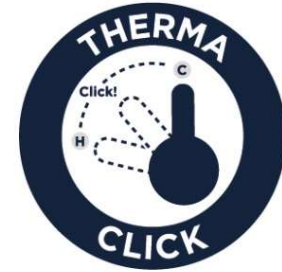

- Eco Start is NOW available on the NEW Easyfit taps Maple, Spruce & Pine and the Pull-outs Axia, Jule, & Sabre
- Set with cold water in the default start position, with the boiler not being engaged.
- Hot water is only activated when the tap is moved from the central position (towards the red VBL marking). The boiler is then engaged.
- The opening of the tap in the cold position stops unnecessary engagement of the boiler, saving consumers energy and cost and making their home eco-friendlier.
- Calculations show consumers could save up to 10% energy* usage on the Eco-Start tap.

Eco Start

Thermaclick

Thermaclick feature, available in Maple, Spruce and Pine Easyfit taps, provides an enhanced feature through the addition of a mid-point click that indicates when the water has reached the optimal temperature for washing your hands - ensuring a comfortable handwashing experience every time.

The Perfect Finish

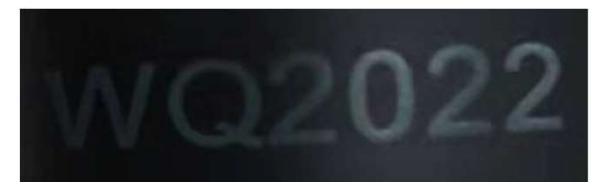

A Mark Of Quality

All our new products feature our premium visual brand language.

Beautiful chrome, matte black coatings and brushed brass finishes adorned with crisp pad printed markings to enhance our premium finishes.

Perfectly communicating Bristan's intuitive, user-friendly visual brand language.

Using commercial grade processes to ensure a lasting, quality finish every time.

Lasting Quality

The process used to manufacture the black finish is **EPD (Electrophoretic Deposition)**. Whereby the black coating is directly coated to the brass, for a harder-wearing finish. With no additional plating to flake or tarnish, every product in the range has been independently tested to ensure the highest finish standards.

Rigorously tested to the highest standards, for a premium finish we're confident will stand the test of time.

- Stronger adhesion with no flaking over time.
- Stands up to everyday use and won't degrade through mechanical wear and tear.
- Corrosion and stain resistant.

Bristan give a 3 year warranty on all 'special' finishes (i.e. everything except chrome)

Lasting Quality

The process used to manufacture our brushed brass and stainless steel finish is **PVD (Physical Vapour Deposition)**. PVD, involves physically depositing atoms, ions or molecules of a coating material directly onto the brass.

The coatings are not just metal layers, they are compound materials which are deposited atom by atom, forming a thin, bonded metal surface layer which is extremely durable.

Rigorously tested to the highest standards, for a premium finish we're confident will stand the test of time.

- Hard surface (2nd only to Diamond) so extremely wear resistance.
- Stands up to everyday use and won't degrade through mechanical wear and tear or tarnishing.
- Corrosion and chemical resistant providing a uniform standard of finish.

Bristan give a 3 year warranty on all 'special' finishes (i.e. everything except chrome)

Guarantee

Guarantee

Bristan products offer durable styles and trend-inspired designs, with reliable guarantees, Bristan is always the easy choice for taps and showers you can trust to deliver.

The NEW Bristan products feature the same assurance you'd expect from the UK's number 1 manufacturer. So, you can buy with confidence.

- Easyfit and Pull Out Kitchen Taps - 10 years (covers parts, no labour).
- Essentials Kitchen Taps - 5 years (covers parts, no labour).
- 3 year warranty on all 'special' finishes.

Thank you.
